

MANAGING SAFELY

APL Training are the North West's premier training provider, situated between Manchester and Liverpool we are ideally placed to cater for all aspects of training. Above all else we recognise that there are three vital elements that impact on how candidates absorb course information:

*The training environment
The right trainers
The correct equipment*

3 or 4 Days - Managing Safely

- Introducing Managing safely**
Some managers may see health and safety as an add-on to their role - even an intrusion. The first module makes it clear that managers are accountable for their teams, and makes a persuasive case for managing safety.
- Assessing risks**
This module defines and demystifies 'risk' and 'risk assessment'. Risk assessments and a simple scoring system are introduced, and delegates carry out a series of assessments.
- Controlling risks**
Here the session tackles cutting risks down, concentrating on the best techniques to control key risks, and how to choose the right method.
- Understanding your responsibilities**
This module looks at the demands of the law and how the legal system works, and introduces a health and safety management team.
- Investigating accidents and incidents**
This session starts with why accidents should be investigated, and goes on to cover why things go wrong, and how to carry out an investigation when they do.

- Identifying hazards**
All the main issues any operation has to deal with are covered in this module - entrances and exits, work traffic, fire, chemicals, electricity, physical and verbal abuse, bullying, stress, noise, housekeeping and the working environment, slips, trips and falls, working at height, computers and manual handling.
- Measuring performance**
This module explains how checking performance can help to improve health and safety. Delegates learn how to develop basic performance indicators, and get to grips with auditing and proactive and reactive measuring.
- Protecting our environment**
A short but effective introduction to waste and pollution leads into a look at how organisations and individual managers can get involved in cutting down environmental impacts.

“
Memorable and thought-provoking facts, figures and case studies help drive the points home over the whole course . . .
