

# LOAD AND UNLOAD

APL Training are the North West's premier training provider, situated between Manchester and Liverpool we are ideally placed to cater for all aspects of training. Above all else we recognise that there are three vital elements that impact on how candidates absorb course information.

**The training environment**  
**The right trainers**  
**The correct equipment**

This course provides training for the loading and unloading of MEWP's on beaver tail and slide bed transport vehicles. Loading and unloading should be carried out by trained staff who are aware of the risks involved. Drivers should also be aware of the additional risk of the load, or part load, moving while the vehicle is being driven. This applies to all vehicles and to all types of load.

The driver is ultimately responsible for the load carried on their vehicle, whether or not they were involved in the securing of the load.

**GIVING YOU THE RIGHT TRAINING  
FOR THE RIGHT JOB...
